

ILLUMINO ELETTRONICA / HUT

TECHNOLOGIES - HOME AND URBAN

PADUA 12th-14th OCTOBER 2017

The unique event available on the "system integration" Industry

To create, run, validate and maximise integrated
solutions and technologies in the areas
of Lighting, Smart Home and Security

IT IS AN EVENT OF

Electronics has revolutionized our World introducing LED technology in Lighting applications and creating new conditions with the science of Internet of Things (IoT) for both the wellbeing and the security of people. In this way leading us to a new context: **Home & Urban technologies.**

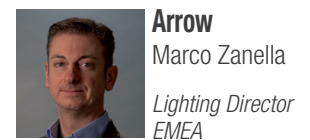

“Illuminotronica represents a major milestone in our policy of constructive dialogue with our target of installers. It is a leading show for those professionals in the system integration”

“We are very happy of the results achieved which were beyond our expectations. We would like to congratulate the organization for the efficient manner in which they have provided and offered the event. Illuminotronica represents a looking-forward incubator for great ideas”

“We have experienced a perfect platform to introduce our new Intercom products with which we are market leader in the Voip intercom field. It means “making an experience” to be here and see a great deal of solutions interacting with one another also including in the field of home automation”

“What did persuade us to select Illuminotronica as our main event in South-Europe ? First of all, it represents the very influential Italian exhibition for Lighting, Electronics and Home Automation. It produces excellent target audience and superior contents to renew annually. For us, it is important to support the quality aimed at meeting the requirements in accordance with the European standards”

Integration market

The Internet of Thing (IoT) **MARKET** for the **SMART HOME** applications is growing in 2017 in Italy with double digit rates. It is promising to achieve a true boom, in particular in both Security applications (motion detectors, video surveillance and all that) and in energy efficiency.

The product proprieties areas

INDUSTRIAL LIGHTING

Lighting sources, L.E.D's, OLED's) and retrofiting.
Application: domestic lighting, business lighting, public lighting

SMART LIGHTING

Driving systems, software management, applications

SERVICES

EMS, PCB, Customized application, assistance

SUB-SYSTEMS

Thermal management, drivers, power supply, displays, embedded

INSTRUMENTATIONS

Test&Measurement
Exposure meters,
Thermal cameras...

SYSTEMS & INTEGRATION

Integration for basic solutions, building automation, oversight-check role, energetic Energy

SECURITY

Anti-intruder devices, video surveillance, entrance control, fire-fighting systems

PLANT DESIGN

Data network, wiring, wireless, video-intercom field, audio/video

IoT

Hardware, Software, Connectivity, Cloud, Big Data, APP, Safety

ELECTRONICS AND MATERIALS

Semiconductors, connectors, electromechanicals, actuators, opticals and chemicals

Special initiatives of ILLUMINOTRONICA

LEDDOVE

A temporary showroom of original "made in Italy" products selected for their design and technology

START UP

A project by Assodel to show new ideas and innovations in Electronics, IoT, Smart lighting and integration applications

SMART PRO

A training path for installers to achieve a special qualification in Smart Home Technologies

ILLUMINO Led Lighting:
Products and systems
for smart lighting

TRONICA Electronics (components and subsystems):
Technology for Industry

HUT home & urban technologies:
Applications of home automation

An Exhibition area in Northern East Italy,
crossroad of the main trade and business
corridors towards Northern East Europe

Events waiting for ILLUMINO TRONICA 2017

Verona

28th March

Knowledge for growth: skills certification
for the advanced installer

Bologna

11st May

Retraining for growth: to get a smart
home through home automation,
energy efficiency e new regulations

Bergamo

June

How will evolve the installer's job?
Home Automation and Security
for building redevelopment

Firenze

July

Skills qualification for plant
designing operators

Reggio Emilia

POWER FORTRONIC

20th-21st September

New energy for your ideas: do not miss this
chance to meet up with those who are involved
in the power electronics industry in Italy

Padova

FLORMART

21st-23rd September

To light up the flora green through LED's
solutions and Smart Lighting technologies
